Butterfly valves

INFLATABLE SOFT SEATED

Ghibson soft seated butterfly valves (PD, KI, KA, KX and DL series) are designed to fit in industrial applications from powder conveyance to marine and petrochemical requirements.

The BVDL and BLDL series was created for the handling of loose products, in which the disc geometry and the working principle is designed to allow low opening/closing friction and abrasion.

BVDL - Wafer **BLDL** - Lug
DN 50 - 500 • 2" - 20"

Only complete package available
 (with actuation system included).
 Bare shaft configuration not salable.

Max working pressure:

BVDL/BLDL DN 50÷500: **6 Bar**
 Flange: **PN 6 - 10 - 16 • A150**

Design:

EN 593 ~ EN 736 ~ EN 12516 ~ EN 1092
 ISO 5211 ~ DIN 3337 ~ API 609
 PED 2014/68/EU - Mod. H

Face to face:

DIN EN 558 Series 20 ~ ISO 5752 Series 20
 BS-5155 Series 4 ~ MSS-SP67
 API609 cat.A ~ NFE 29305-1

Feeding pressure for actuating system:

Min: 5bar ~ Max: 8 bar

Feeding tension for actuating system:

24 VDC ~ 110 VAC ~ 230VAC
 To be defined in the order

Testing:

EN 12266-1 Rate A (supersedes DIN 3230)
 ISO 5208 Rate A ~ API 598

Tag:

EN 19 ~ MSS SP-25

All valves are supplied with a metallic label in compliance with PED directive.

Pneumatic Seated Valves:

- created for bulk handling, in which the disc geometry is studied to permit low torque open/close.
- the lower friction disc/seat highly reduces heavily wear of the seats over time.
- longer lifetime of the valves and possibility to use of smaller actuators guarantee economical and space advantage.
- easy installation with pre-packaged actuating solution.

MORE THAN 40 YEARS OF HIGH QUALITY EXPERIENCE

Ghibson Italia can now boast of more than 40 years of experience in manufacturing of industrial valves. In these 40 years we have designed and manufactured in our facilities in Italy butterfly valves and check valves, for the most different industrial applications.

We export our products all over the world always providing our customers with the best assistance during all the phases: design, installation, maintenance.

MARKET SEGMENTS and APPLICATIONS

Marine
Water Treatment
Pulp & Paper
Power Plant
Nuclear Plant
HVAC
Chemical & Petrochemical
Powder Conveying Systems
Food & Beverage

Steam isolation - Vacuum service - Refining
Cooling Water systems - Metallurgical processes
Powder transportation & storage
Oil field recovery - Liquid natural gas
Steam service - Steam Turbine
Saltwater Service - District heating & cooling
Hot Air & Smokes
Chemicals storage & transportation
Food & Beverage processes

DEPARTMENTS

- RESEARCH & DEVELOPMENT
- DESIGN
- CUSTOMIZATION
- PRODUCTION & LOGISTIC
- SALES & MARKETING
- QUALITY CONTROL
- CERTIFICATIONS
- PACKING AND SHIPPING
- AFTER SALES SUPPORT

WIDE RANGE OF PRODUCTS

Very large choice of materials including valves of every alloy of carbon or stainless steel, bronze, aluminium, as well as with PTFE or Polypropylene.

We manufacture rubber seated valves with many elastomer types (EPDM, NBR, FKM, Silicone, Carboxidate among others), as well as PTFE, RTFE seated valves with many different coatings such as Halar, Rilsan, PFA, Chenisil, etc.

We can offer a total assistance:

- before selling we can start from dimensioning the valves and actuators, make selection of materials for all parts upon knowing the specification, prepare all types of drawings etc.
- after selling we make final documentation, provide installation supervision, undertake commissioning etc.
